INDEX

Journal of College Science Teaching

Volume 1, October 1971—April 1972

Author Index

Arons, A. B. *Anatomy of an Introductory Course in Physical Science.* April: 30.

Avner, Elaine S. *Computer-Assisted Instruction in Astronomy.* April: 44

Barnard, W. Robert, Contributing Editor: Audiovisuals. October: 27; December: 49; February: 58; April: 59.

Barnard, W. Robert. *A Look at Utilization: Problems and Processes for Science Instruction,* October: 27. *Using Projected Materials,* December: 49. *Chalkboards,* February: 58. (Audiovisuals)

Bent, Henry A. *Where Is Education in Chemistry Headed?* December: 20.

Boohar, Richard K. *Relevancy and Revolution.* December: 58. (Opinion)

Bork, Alfred M. *Introduction to Computer Programming Languages.* December: 12.

Calandra, Alexander. *Science for Nonscience Majors.* April: 35.

Cox, James W. *Two Decades of Science Cartoons from* The New Yorker. December: 34.

deViedma, Manuel G. *Biological Teaching and Research in Spain.* October: 53.

Duffy, Norman. *Super 8mm Chemistry Films.* April: 59. (Audiovisuals)

Estee, Charles R., Contributing Editor: Innovations. October: 21; December: 40; February: 53; April: 55.

Foster, Willis R., and Kreysa, Frank J. *SSIE: An Interdisciplinary Resource for Teachers.* December: 29.

Goodstein, Madeline P. *Textbook Usage in Physical Science.* April: 53.

Goran, Morris. *Laboratory Instruction for Introductory Courses.* February: 66. (Opinion)

Gratz, Pauline. *Inquiry Laboratory for the Teaching of Human Ecology.* October: 21. (Innovations)

Green, Ben A., Jr. *Is the Keller Plan Catching on Too Fast?* October: 50.

Hadary, Doris E., and Leo Schubert. *Introductory Science: A Chemistry Department Institutes a Science Education Program.* February: 43.

Hein, Don *et al. A New Undergraduate Program for Future Physics-Chemistry Teachers.* October: 47.

Holland, F. D., Jr. *Report on the Council on Education in the Geological Sciences.* December: 45 (Abstracts)

Holton, Gerald. *Improving College Science Teaching: Lessons from Contemporary Science and the History of Science.* October: 31.

Hood, Ronald D., and Weldon L. Witters. *Chemical Teratogenesis.* February: 27.

Hood, Ronald D., and Weldon L. Witters. *Observation of Heart Beat and Circulation in* Xenopus laevis *Tadpoles.* December: 38.

Howland, Howard C. *Algebraic Language Instruction in a Biological Sciences Curriculum.* April: 24.

Humphreys, Lloyd G. *The Curriculum Never Changes—Only the Reasons for Offering It Change.* October: 40.

Hutchinson, Eric. *Science Courses: Required or Voluntary?* October: 44.

Jones, Katherine M. *An Inter-College Team Teaching Project.* April: 41.

Kauffman, George B. *Teaching the History of Science: A Biographical Approach.* December: 26.

Kelly, Harry C. *Investment in Education in the Sciences.* October: 69. (Opinion)

Kormondy, Edward J. *CUEBS and the College Biology Teacher.* October: 23. (Abstracts)

Kreysa, Frank J., and Willis R. Foster. *SSIE: An Interdisciplinary Resource for Teachers.* December: 29.

Krockover, Gerald H. *On My Own: An Individualized Science Methods Approach.* December: 39.

Ladd, George T. *Factors Affecting Student Choice of Pass-Fail in an Introductory Science Course.* December: 17.

Lerner, Morris R. *An NSTA Position Statement.* April: 68. (Opinion)

Libby, Willard F. *A Relevant Education.* October: 37.

Lounsbury, John F. *Publications of the Commission on College Geography.* October: 25. (Abstracts)

MacKnight, Franklin C., and Francis T. Siemankowski. *Spatial Cognition: Success Prognosticator in College Science Courses.* October: 56.

Mervine, Katherine E. *Report on the Commission on College Physics.* December: 42. (Abstracts)

Mielke, Paul T. *Report on the CUPM Program.* December: 47. (Abstracts)

Naibert, Zane, Contributing Editor: Books, October: 60; December: 52; February: 60; April: 64.

Nelson, Ted, *et al. A New Undergraduate Program for Future Physics-Chemistry Teachers.* October: 47.

O'Connor, Rod. *Resource Materials of the Advisory Council on College Chemistry (AC_3).* October: 25. (Abstracts)

Parsegian, V. L. *What Makes Studies Interdisciplinary?* February: 24.

Pecsok, Robert L. *Alternatives in Chemical Education.* December: 31.

Peterson, Glen E., Contributing Editor: Abstracts. October: 23; December: 42; February: 57; April: 57.

Poitras, Adrian W., Contributing Editor: Equipment & New Products. October: 63; December: 54; February: 64; April: 67.

Rapoport, Anatol. *Mathematics and the Modern Sciences.* February: 33.

Reed, George. *An Outline for the Education of a K-12 Planetarium Teacher.* February 51.

Romey, William D. *Operational Humanism: The Earth Science Teacher Preparation Project.* April: 38.

Sanderson, R. T. *Chemical Bonds I.* February: 16.

Sanderson, R. T. *Chemical Bonds II.* April: 47.

Saperstein, Alvin M. *Evaluating Instruction.* December: 58. (Opinion)

Scherer, George A. *Application of Integrated Circuit Operational Amplifiers.* February: 31.

Schubert, Leo, and Doris E. Hadary. *Introductory Science: A Chemistry Department Institutes a Science Education Program.* February: 43.

Schubert, Leo. *The Beginning of a New Journal,* October: 9. *The Interdisciplinary Approach,* December: 7. *On Common Sense,* February: 9. *On Options,* April 9. (Editorials)

Siemankowski, Francis T., and Franklin C. MacKnight. *Spatial Cognition: Success Prognosticator in College Science Courses.* October: 56.

Strassenburg, A. A., Contributing Editor: National and Legislative News. *Financing Higher Education,* October: 15. *Scientific Talent—What Is Being Done to Use It and Preserve It?,* December: 8. *Technical and Vocational Education,* February: 10. *External Degree Programs,* April: 13.

Stevens, John, *et. al. A New Undergraduate Program for Future Physics-Chemistry Teachers.* October: 47.

Svingen, Terry, *et al. A New Undergraduate Program for Future Physics-Chemistry Teachers.* October: 47.

Tamir, Pinchas. *Biology and Agriculture: A Problem in Education.* February: 48.

Ward, Cynthia V. L. *Use of Opinion Polls.* February: 47.

Witters, Weldon L., and Ronald D. Hood. *Chemical Teratogenesis.* February: 27.

Witters, Weldon L., and Ronald D. Hood. *Observation of Heart Beat and Circulation in* Xenopus laevis *Tadpoles.* December: 38.

Title Index, Vol. 1

Abstracts. (See Peterson, Glen)

Algebraic Language Instruction in a Biological Sciences Curriculum. Howard C. Howland. April: 24.

Alternatives in Chemical Education. Robert L. Pecsok. December: 31.

Anatomy of an Introductory Course in Physical Science. A. B. Arons. April: 30.

Applications of Integrated Circuit Operational Amplifiers. George A. Scherer. February: 31.

Audiovisuals. (See Barnard, W. Robert)

Biological Teaching and Research in Spain. Manuel G. deViedma. October: 53.

Biology and Agriculture: A Problem in Education. Pinchas Tamir. February: 48.

Books. (See Naibert, Zane)

Chemical Bonds I. R. T. Sanderson. February: 16.

Chemical Bonds II. R. T. Sanderson. April: 47.

Chemical Teratogenesis. Ronald D. Hood and Weldon L. Witters. February: 27.

Computer-Assisted Instruction in Astronomy.

Elaine S. Avner. April: 44.
CUEBS and the College Biology Teacher. Edward J. Kormondy. October: 23. (Abstracts)
Curriculum Never Changes—Only the Reasons for Offering It Change, The. Lloyd G. Humphreys. October: 40.
Editorials. (See Schubert, Leo)
Equipment & New Products. (See Poitras, Adrian W.)
Evaluating Instruction. Alvin M. Saperstein. December: 58. (Opinion)
Factors Affecting Student Choice of Pass-Fail in an Introductory Science Course. George T. Ladd. December: 17.
Improving College Science Teaching: Lessons from Contemporary Science and the History of Science. Gerald Holton. October: 31.
Innovations. (See Estee, Charles R.)
Inquiry Laboratory for the Teaching of Human Ecology. Pauline Gratz. October: 21. (Innovations)
Inter-College Team Teaching Project, An. Katherine M. Jones. April: 41.
Introduction to Computer Programming Languages. Alfred M. Bork. December: 12.
Introductory Science: A Chemistry Department Institutes a Science Education Program. Doris E. Hadary and Leo Schubert. February: 43.
Investment in Education in the Sciences. Harry C. Kelly. October: 69. (Opinion)
Is the Keller Plan Catching on Too Fast? Ben A. Green, Jr. October: 50.
Laboratory Instruction for Introductory Courses. Morris Goran. February: 66. (Opinion)
Look at Utilization, A: Problems and Processes for Science Instruction. W. Robert Barnard. October: 27. (Audiovisuals)
Mathematics and the Modern Sciences. Anatol Rapoport. February: 33.
National & Legislative News. (See Strassenburg, A. A.)
New Undergraduate Program for Future Physics-Chemistry Teachers, A. Ted Nelson, John Stevens, Terry Svingen, and Don Hein. October: 47.
NSTA Position Statement, An. Morris R. Lerner. April: 68. (Opinion)
Observation of Heart Beat and Circulation in Xenopus laevis *Tadpoles.* Ronald D. Hood and Weldon L. Witters. December: 38.
On My Own: An Individualized Science Methods Approach. Gerald H. Krockover. December: 39.
Operational Humanism: The Earth Science Teacher Preparation Project. William D. Romey. April: 38.
Outline for the Education of a K-12 Planetarium Teacher, An. George Reed. February: 51.
Publications of the Commission on College Geography. John F. Lounsbury. October: 25. (Abstracts)
Relevancy and Revolution. Richard K. Boohar. December: 58. (Opinion)
Relevant Education, A. Willard F. Libby. October: 37.
Report on the Commission on College Physics. Katherine E. Mervine. December: 42. (Abstracts)
Report on the Council on Education in the Geological Sciences. F. D. Holland, Jr. December: 45. (Abstracts)
Report on the CUPM Program. Paul T. Mielke. December: 47. (Abstracts)
Resource Materials of the Advisory Council on College Chemistry (ACC). Rod O'Connor. October: 25. (Abstracts)
Science Courses: Required or Voluntary? Eric Hutchinson. October: 44.
Science for Nonscience Majors. Alexander Calandra. April: 35.
Spatial Cognition: Success Prognosticator in College Science Courses. Francis T. Siemankowski and Franklin C. MacKnight. October: 56.
SSIE: An Interdisciplinary Resource for Teachers. Willis R. Foster and Frank J. Kreysa. December: 29.
Super 8mm Chemistry Films. Norman Duffy. April: 59. (Audiovisuals)
Teaching the History of Science: A Biographical Approach. George B. Kauffman. December: 26.
Textbook Usage in Physical Science. Madeline P. Goodstein. April: 53.
Two Decades of Science Cartoons from The New Yorker. James W. Cox. December: 34.
Use of Opinion Polls. Cynthia V. L. Ward. February: 47.
What Makes Studies Interdisciplinary? V. L. Parsegian. February: 24.
Where is Education in Chemistry Headed? Henry A. Bent. December: 20.

Volume 2, October 1972—April 1973

Author Index

Ballard, Richard, and Alfred Bork. *Physics Computer Development Project.* April: 14.
Barnard, W. Robert, Contributing Editor: Instructional Media. October: 45; December: 45; February: 55; April: 52.
Belman, Hilda. *The Field Study as an Educational Supplement.* October: 52. (How I Do It)
Berry, Keith O., and R. D. Sprenger. *Research in the Liberal Arts College.* December: 12.
Blaustein, Ernest, Contributing Editor: Books. October: 54; December: 49; February: 57; April: 56.
Boohar, Richard K. *The Ingredients of Real Relevancy.* October: 67. (Opinion)
Bork, Alfred, and Richard Ballard. *Physics Computer Development Project.* April: 14.
Brown, Kristine, Ronald Sklar, and James F. Corwin. *A Science Teaching Resource Center at Work.* December: 24.
Buikema, Arthur L., Jr. *Achieving Relevance through Biology.* December: 21.
Butzow, John W., and Roland Pare. *Physical Science: A Multi-Media Facilitated Course.* October: 29.
Calmon, Calvin, and Vincent Sollimo. *Community College Advisory Committee.* April: 48. (Innovations)
Carlson, Elof Axel. *Teaching by Television: A Critique.* February: 15.
Coffey, Charles E., Leslie N. Davis, and Daniel J. Macero. *Program Design for CAI.* December: 31. (How I Do It)
Corwin, James F., Kristine Brown, and Ronald Sklar. *A Science Teaching Resource Center at Work.* December: 24.
Costa, Robert R. *Cataloging Scientific Literature: A Class-Generated Activity.* April: 41. (How I Do It)
Crocker, Denton W., and Ruth Fleishman. *Introductory Biology and Scientific Process: Any Connection?* October: 33.
Darrow, Frank. *Tape-Narrated, Single Concept Films for Laboratory Instruction.* October: 46. (Audiovisuals)
Davis, Leslie N., Charles E. Coffey, and Daniel J. Macero. *Program Design for CAI.* December: 31. (How I Do It)
Dence, Joseph B. *An Integrated Laboratory Course in Chemistry.* April: 39.
Denny, Rita T. *The Mathematics Skill Test and College Freshmen.* December: 33. (How I Do It)
Dietz, Robert S. *Plate Tectonics, Sea-Floor Spreading, and Continental Drift.* October: 16.
Elliott, Walter E. *Experiences with Self-Paced General Physics Courses.* February: 35. (How I Do It)
Emmeluth, Donald S. *Achievement Motivation.* October: 27.
Engdahl, Terry K. *Chem Lab Uses Mobile Computer.* April: 50. (Innovations)
Estee, Charles R., Contributing Editor: Innovations. October: 42; December: 38; February: 45; April: 48.
Flansburg, Leonard. *On the Nature and Value of Science.* April: 64. (Opinion)
Flansburg, Leonard. *Science and Social Problems.* December: 58. (Opinion)
Fleishman, Ruth, and Denton W. Crocker. *Introductory Biology and Scientific Process: Any Connection?* October: 33.
Gardner, Marjorie. *The Chemistry Teaching Associate Program.* October: 20.
Gore, W. J., *et al. BioCO-TIE: The Genesis of a Cooperative Curriculum Improvement Program.* April: 25.
Gorman, Mel. *A New Philosophy for General Chemistry.* February: 68. (Opinion)
Gross, Bernard F. *Scientific Literacy and the Nonscience Major.* February: 10.
Gueths, J. E. *A Proctor's Course for the Keller Plan.* February: 30.
Haakonsen, Harry O. *Developing an Audio-Tutorial System.* April: 31.
Hayes, Wayland J., Jr., and Sheldon D. Murphy. *Toxicology—A Neglected Science?* December: 18.
Hicks, Donald G. *A Student-Teacher Team Approach to Teaching Practical Chemistry.* April: 27.
Hunter, Walter E. *Individualized Approaches to Chemistry vs. Group Lecture Discussions.* April: 35.
Husband, David. *An Audio-Tutorial Course for Nonmajor Biology Students.* April: 42. (How I Do It)
Husk, G. Ronald. *The Alchemist and Early Chemist.* October: 36.
Johnson, G. A., *et al. BioCO-TIE: The Genesis of a Cooperative Curriculum Improvement Program.* April: 25.
Jordan, J. P., *et al. BioCO-TIE: The Genesis of a Cooperative Curriculum Improvement Program.* April: 25.
Jungwirth, E. *Scientists as People.* February: 24.
Kimbrough, T. Daniel, and Gerald C. Llewellyn. *The Pineal Gland.* February: 18.
Lehman, Richard S. *Computer Generates Data for Statistics.* April: 48. (Innovations)

Llewellyn, Gerald C., and T. Daniel Kimbrough. *The Pineal Gland.* February: 18.
Llewellyn, Gerald C. *Rapid Preparation of 35mm Projections.* October: 47. (Audiovisuals)
Macero, Daniel J., Leslie N. Davis, and Charles E. Coffey. *Program Design for CAI.* December: 31. (How I Do It)
MacKay, Francis P., and Martin Saltzman. *From Atoms to Australopithecus: an Integrated Approach.* October: 52. (How I Do It)
Mecca, S. J., M. N. Rerick, and J. E. Robertshaw. *Systems Approach to Problem Solving.* April: 50. (Innovations)
Murphy, Sheldon D., and Wayland J. Hayes. *Toxicology—A Neglected Science?* December: 18.
Navari, Rudolph M. *Hematology for Undergraduates.* December: 26.
Nazzaro, James R., João C. Todorov, and Jean N. Nazzaro. *Student Ability and Individualized Instruction.* December: 29.
Nazzaro, Jean N., James R. Nazzaro, and João C. Todorov. *Student Ability and Individualized Instruction.* December: 29.
Pare, Roland, and John W. Butzow. *Physical Science: A Multi-Media Facilitated Course.* October: 29.
Parsegian, V. L., Contributing Editor: Abstracts. October: 50; December: 42; February: 48.
Poitras, Adrian W., Contributing Editor: Equipment & New Products. October: 64; December: 54; February: 65; April: 61.
Potts, M. L. *Environmental Studies Program.* April: 49. (Innovations)
Purcupile, J. C., and L. J. Young. *Student Originated Projects.* December: 15.
Rerick, M. N., J. E. Robertshaw, and S. J. Mecca. *Systems Approach to Problem Solving.* April: 50. (Innovations)
Robertshaw, J. E., M. N. Rerick, and S. J. Mecca. *Systems Approach to Problem Solving.* April: 50. (Innovations)
Rogers, Elizabeth P. *Audio-Tutorial Equipment in a Beginning Chemistry Laboratory.* October: 45. (Audiovisuals)
Roscher, Nina Matheny. *Quantitative Analysis: Using Projects to Increase Interest.* February: 33.
Russell, Thomas L. *Logical and Chronological Evidence From the History of Science.* April: 23.
Saltzman, Martin, and Francis P. MacKay. *From Atoms to Australopithecus: An Integrated Approach.* October: 52. (How I Do It)
Schubert, Leo. *Hierarchical Learning,* October: 9. *On Creativity,* December: 11. *On Metrication,* February: 9. *Changing Waters,* April: 13. (Editorials)
Scott, G. P. *Natural Complexity.* April: 49. (Innovations)
Sklar, Ronald, Kristine Brown, and James F. Corwin. *A Science Teaching Resource Center at Work.* December: 24.
Sollimo, Vincent, and Calvin Calmon. *Community College Advisory Committe.* April: 48. (Innovations)
Sprenger, R. D., and Keith O. Berry. *Research in the Liberal Arts College.* December: 12.
Staff Report. *Project Documerica.* October: 40.
Strassenburg, A. A., Contributing Editor: National & Legislative News. *Education Amendments of 1972,* October: 10. *The President's Message on Science and Technology,* December: 35. *The National Science Foundation Program for 1973,* February: 40. *Technology Assessment,* April: 45.
Todorov, João C., James R. Nazzaro, and Jean N. Nazzaro. *Student Ability and Individualized Instruction.* December: 29.
Uritam, Rein A. *New Directions in Physics Education.* October: 23.
Vattano, F. J., *et al. BioCO-TIE: The Genesis of a Cooperative Curriculum Improvement Program.* April: 25.
Wagner, Bernard M. *Pathobiology.* April: 19.
Walker, C. Noojin. *Physical Science and Interdisciplinary Relevance.* December: 57. (Opinion)
Wall, Edward. *The New Leaning Tower: A Physical Science Course for Majors in Elementary Education.* February: 37. (How I Do It)
Weisz, Paul B. *Finagle's Laws: The Present Official Formulation.* December: 16.
Young, Jay A. *The Chemical Value of Pi.* February: 28.
Young, L. J., and J. C. Purcupile. *Student Originated Projects.* December: 15.

Title Index, Vol. 2

Abstracts. (See Parsegian, V. L.)
Achievement Motivation. Donald S. Emmeluth. October: 27.
Achieving Relevance through Biology. Arthur L. Buikema, Jr. December: 21.
Alchemist and Early Chemist, The. G. Ronald Husk. October: 26.
Audio-Tutorial Course for Nonmajor Biology Students, An. David Husband. April: 42. (How I Do It)
Audio-Tutorial Equipment in a Beginning Chemistry Laboratory. Elizabeth P. Rogers. October: 45. (Audiovisuals)
Audiovisuals (Instructional Media). (See Barnard, W. Robert)
BioCO-TIE: The Genesis of a Cooperative Curriculum Improvement Program. John Patrick Jordan, G. A. Johnson, W. J. Gore, and F. J. Vattano. April: 25.
Books. (See Blaustein, Ernest)
Cataloging Scientific Literature: A Class-Generated Activity. Robert R. Costa. April: 41. (How I Do It)
Chemical Value of Pi, The. Jay A. Young. February: 28.
Chemistry Teaching Associate Program, The. Marjorie Gardner. October: 20.
Chem Lab Uses Mobile Computer. Terry K. Engdahl. April: 50. (Innovations)
Community College Advisory Committee. Vincent Sollimo and Calvin Calmon. April: 48. (Innovations)
Computer Generates Data for Statistics. Richard S. Lehman. April: 48. (Innovations)
Developing an Audio-Tutorial System. Harry O. Haakonsen. April: 31.
Equipment & New Products. (See Poitras, Adrian W.)
Environmental Studies Program. M. L. Potts. April: 49. (Innovations)
Experiences with Self-Paced General Physics Courses. Walter M. Elliott. February: 35. (How I Do It)
Field Study as an Educational Supplement, The. Hilda Belman. October: 52. (How I Do It)
Finagle's Laws: The Present Official Formulation. Paul Weisz. December: 16.
From Atoms to Australopithecus: An Integrated Approach. Francis P. MacKay and Martin Saltzman. October: 52. (How I Do It)
Hematology for Undergraduates. Rudolph M. Navari. December: 26.
Individualized Approaches to Chemistry vs. Group Lecture Discussions. Walter E. Hunter. April: 35.
Ingredients of Real Relevancy, The. Richard K. Boohar. October: 67. (Opinion)
Innovations. (See Estee, Charles R.)
Instructional Media. (See Barnard, W. Robert)
Integrated Laboratory Course in Chemistry. Joseph B. Dence. April: 39.
Introductory Biology and Scientific Process: Any Connection? Ruth Fleishman and Denton W. Crocker. October: 33.
Logical and Chronological Evidence from the History of Science. Thomas L. Russell. April: 23.
Mathematics Skill Test and College Freshmen, The. Rita T. Denny. December: 33. (How I Do It)
Natural Complexity. G. P. Scott. April: 49. (Innovations)
New Directions in Physics Education. Rein A. Uritam. October: 23.
New Leaning Tower: A Physical Science Course for Majors in Elementary Education. Edward Wall. February: 37. (How I Do It)
New Philosophy for General Chemistry, A. Mel Gorman. February: 68. (Opinion)
On the Nature and Value of Science. Leonard D. Flansburg. April: 64. (Opinion)
Pathobiology. Bernard M. Wagner. April 19.
Physical Science: A Multi-Media Facilitated Course. John W. Butzow and Roland Pare. October: 29.
Physical Science and Interdisciplinary Relevance. C. Noojin Walker. December: 57. (Opinion)
Physics Computer Development Project. Alfred Bork and Richard Ballard. April: 14.
Pineal Gland, The. T. Daniel Kimbrough and Gerald C. Llewellyn. February: 18.
Plate Tectonics, Sea-Floor Spreading, and Continental Drift. Robert S. Dietz. October: 16.
Proctor's Course for the Keller Plan, A. J. E. Gueths. February: 30.
Program Design for CAI. Leslie N. Davis, Charles E. Coffey, and Daniel J. Macero. December: 31. (How I Do It)
Project Documerica. Staff Report. October: 40.
Quantitative Analysis: Using Projects to Increase Interest. Nina Matheny Roscher. February: 33.
Rapid Preparation of 35mm Projections. Gerald C. Llewellyn. October: 47. (Audiovisuals)
Research in the Liberal Arts College. Keith O. Berry and R. D. Sprenger. December: 12.
Science and Social Problems. Leonard Flansburg. December: 58. (Opinion)
Science Teaching Resource Center at Work, A. Kristine Brown, Ronald Sklar, and James F. Corwin. December: 24.
Scientific Literacy and the Nonscience Major. Bernard F. Gross. February: 10.
Scientists as People. E. Jungwirth. February: 24.
Student Ability and Individualized Instruction. James R. Nazzaro, João C. Todorov, and Jean N. Nazzaro. December: 29.
Student Originated Projects. L. J. Young and J. C. Purcupile. December: 15.
Student-Teacher Team Approach to Teaching Practical Chemistry, A. Donald G. Hicks. April: 27.
Systems Approach to Problem Solving. J. E. Robertshaw, M. N. Rerick, and S. J. Mecca. April: 50. (Innovations)
Tape-Narrated, Single Concept Films for Laboratory Instruction. Frank Darrow. October: 46. (Audiovisuals)
Teaching by Television: A Critique. Elof Axel Carlson. February: 15.
Toxicology—A Neglected Science? Sheldon D. Murphy and Wayland L. Hayes, Jr. December: 18.
